PROFESSIONAL EXPERIENCE

JPMorgan Chase, Chicago, IL

May 2006 – June 2026

JPMorgan Payments — Specialized Transactional and Cash Management Division

Product Director & Product Manager

June 2017 – June 2026

Define product strategy, vision, and manage product life cycle

- Directed and managed the statement reporting product via Host-to-Host file transfers using industry-standard BAI, ISO CAMT, and SWIFT MT formats, as well as Application Programming Interface (API) delivery.
- Collaborated with more than 10 global Payments product teams across WIRE, ACH, and Global RTP to develop comprehensive end-to-end payments and reporting reconciliation solutions.
- Strategically managed the product portfolio, achieving 15% compound annual revenue growth by implementing targeted commercialization strategies and maintaining a continuous product enhancement roadmap.
- Authored the long-term vision, strategic roadmap, and feature prioritization for the Treasury Services reporting product, enabling automated cash, payable, and receivables reconciliation with ERP and Treasury workstations.
- Led the conceptualization and architectural design of a large-scale, multi-year platform modernization initiative, securing stakeholder buy-in and coordinating efforts among more than 20 global product and technology teams.

Program Manager

February 2014 – May 2017

Plan, direct, and coordinate initiatives from inception to completion

- Oversaw technology programs with budgets totaling \$2 million, ensuring alignment with strategic business objectives and product priorities through comprehensive management of resources, risks, and stakeholder communications.

Test Manager

May 2006 – January 2014

Define testing strategy, manage testing team, ensure product meets quality standards and business requirements

- Managed a global team of 40 resources to plan and execute User Acceptance Testing for a multi-year program that built the next generation of JPMorganAccess, successfully migrating 30,000 clients to the new platform.
- Established a testing framework and applied best practices within the testing organization, boosting testing quality by 50%.
- Led the development and execution of a data-driven, end-to-end test automation strategy that boosted regression test coverage productivity by 30%.

Accenture, Chicago, IL

May 1997 – April 2006

Consulting Manager

May 1997 – April 2006

Manage project delivery and lead teams of consultants to solve complex problems for clients

- Directed client engagements for Fortune 500 companies, successfully delivering high-value projects over nearly nine years that addressed complex technical and business requirements.
- Provided expert oversight in system and application test management, database development, business process analysis, data architecture, and application design and implementation.
- Successfully managed project scope, budget, and deadlines while ensuring world-class customer service and identifying significant cost-saving opportunities.

EDUCATION

MBA, Finance and Management Information Systems

Indiana University — Kelley School of Business, Bloomington, IN (1995 – 1997)
